

ShinoNetwork Introduce to you

SHINO AI

Simple Trading Tools Based on
Binance Smart Chain

<https://shinonetwork.xyz>

What is Shino AI?

SHINO AI is an advanced trading tools for Binance Smart Chain users. it has three main features:

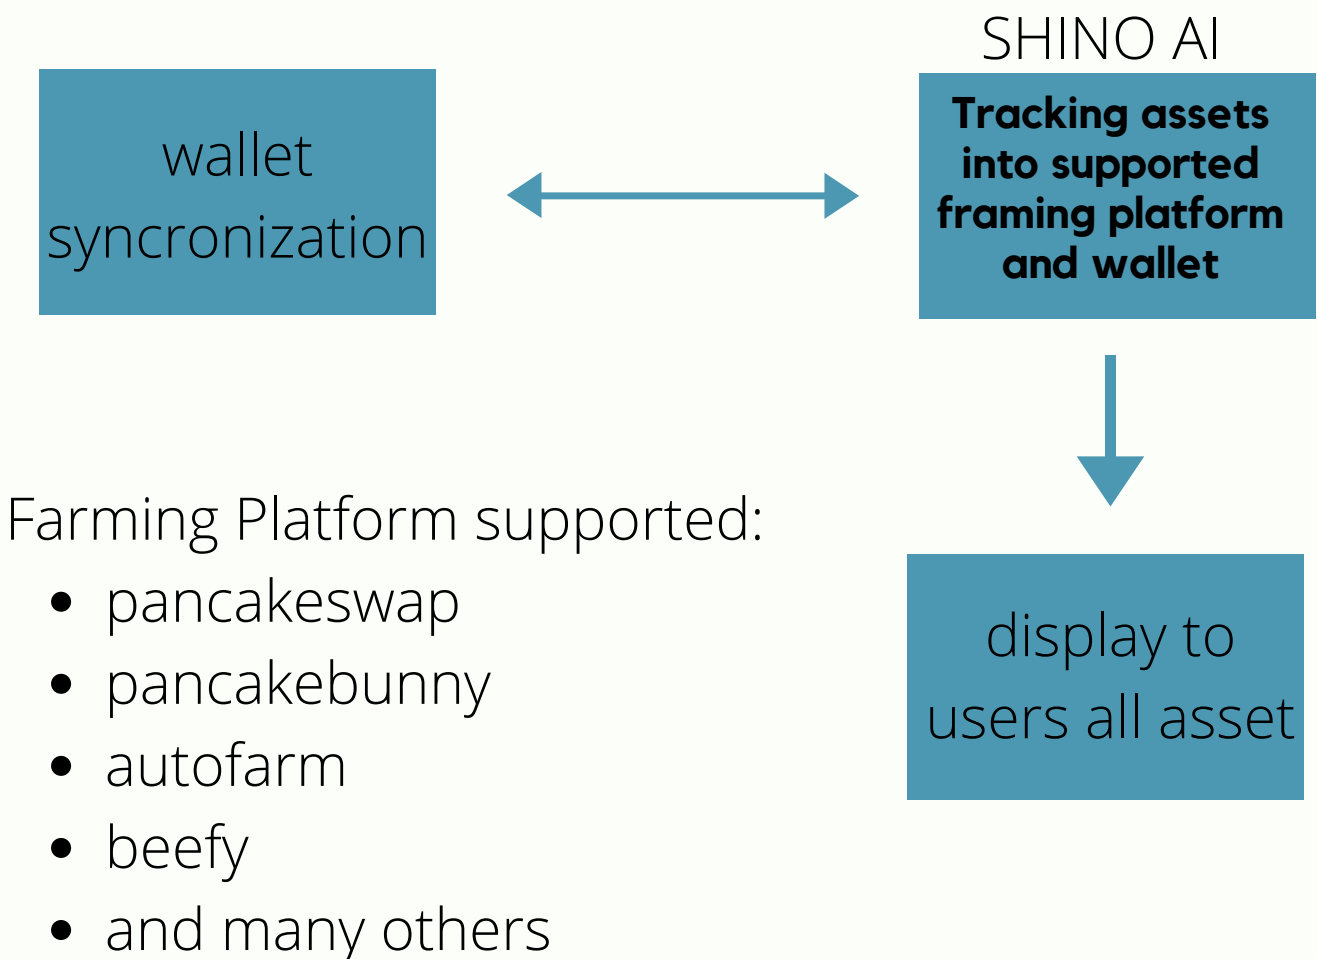

- Aset tracking system
- Token graphic/chart with buy and sell order limit system.
- Token Alert system

Asset Tracking System

it's hard to remember and manage all of our asset because not everything is in our wallets. sometime we do farming/stacking.

Asset Tracking System on Shino AI will help you track all of your assets.

How Asset Tracking System work?

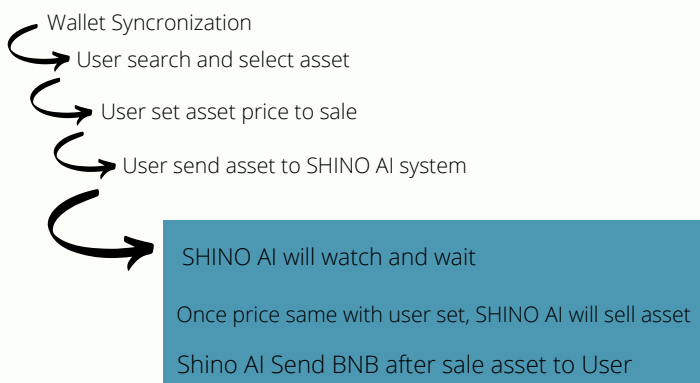

Advanced chart with buy and sell order limit

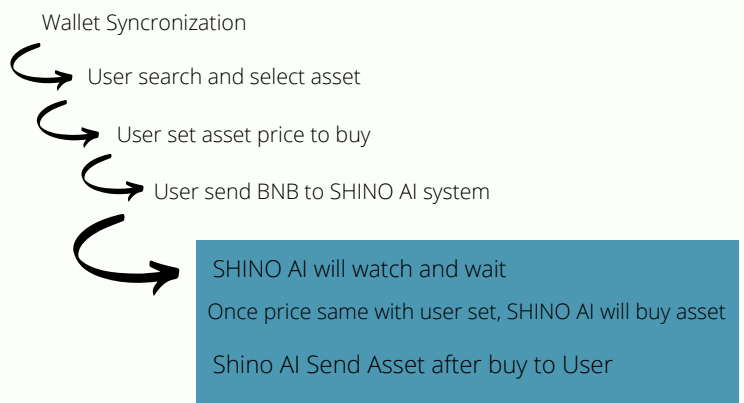

Trading assets into Binance Smart Chain is different with regular or centralized trading platform. Sometime you need to wait for good price before buy or sell your asset. with SHINO AI no need to wait anymore.

How SHINO AI buy and sell order work for you?

Example sale order:

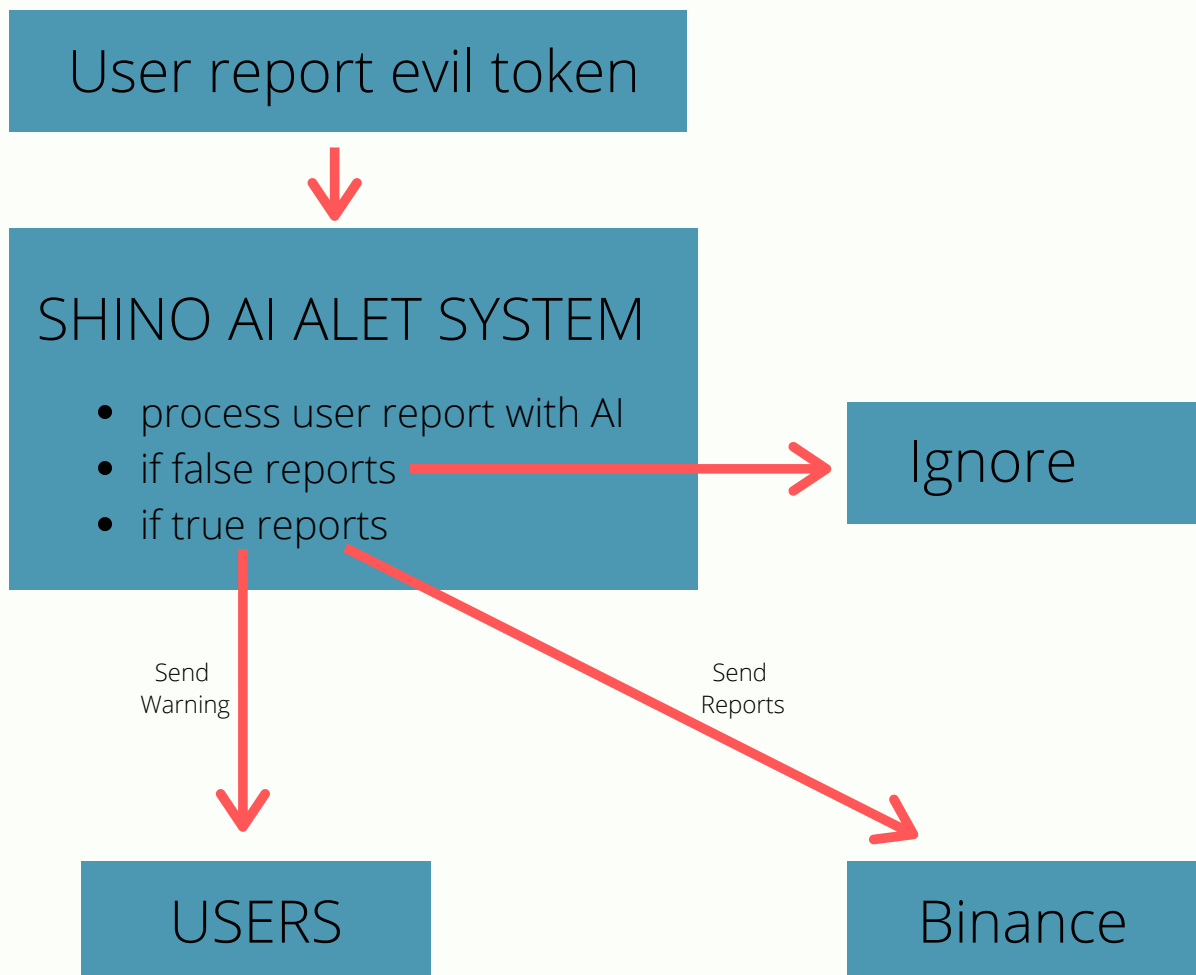

Example buy order:

SHINO AI ALERT SYSTEM

As we know there is too many token created every day on Binance Smart Chain most of them are created for scammer or fraud. SHINO AI come to solve this problem by add early alert system to our users before they buy the evil tokens.

How alert system work?

This system will be divided into two version, free version and pro version. and SHINO token holders will get the privilege of using the pro version. more detailed conditions will be set later.

Of course, this planning system has many shortcomings and needs many improvements.

but we will continue to improve our system.

Regards.
